

## Patella Luxation Examination

|                             |  |
|-----------------------------|--|
| Name                        | Adrahil Dizzy Spell (Forty)                                      |
| Breed                       | Chihuahua SC   |
| Microchip                   | 991003002341907  |
| DOB                         | 28/05/2023   |
| Sex                         | F  |
| Examining Veterinary Clinic | Clinton St Vet<br>5-7 Clinton St Goulburn NSW 2580<br>0248211881 |
| Veterinarian                | Dr. Madeline Cartwell  |
| Date of Evaluation          | 24/10/24   |

### Patella Examination Results

#### 1. Grading – Circle Applicable

|                   | Left                             |                       |                       |                       | Right                            |                       |                       |                       |
|-------------------|----------------------------------|-----------------------|-----------------------|-----------------------|----------------------------------|-----------------------|-----------------------|-----------------------|
| Normal            | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Luxation Grade    | 1                                | 2                     | 3                     | 4                     | 1                                | 2                     | 3                     | 4                     |
| Medial            | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Lateral           | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Onset 6-12 Months | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Onset >12 Months  | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

#### 3. Classification of luxation

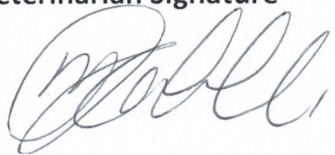

**Grade 1-** The patella easily luxates manually at full extension of the stifle joint but returns to the trochlea when released.

**Grade 2-** There is frequent patellar luxation which, in some cases, becomes permanent.

**Grade 3 -** The patella is permanently luxated with torsion of the tibia and deviation of the tibial crest of between 30 degrees and 50 degrees from the cranial/caudal plane.

**Grade 4 -** The tibia is medially twisted, and the tibial crest may show further deviation medially with the result that it lies 50 degrees to 90 degrees from the cranial/caudal plane.
