Forward

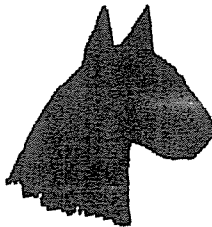

I wish you every success with this venture and wish that we had something to compare with it.

When trying to choose your stud dog, please don't wait until the last minute and rush out to the nearest dog, take your time, check your pedigrees carefully, if possible go and see the dog for yourself, but above all DO NOT be kennel blind.

Even the best of mini's has its problems so make sure that you know where your problems are and try to select a stud dog to correct your problem. Don't be put off from using a good dog because he has a glaring fault, say much too big, if that dog has what you are looking for, go for it, as at the worst you could end up with a quality oversized pup who will throw you some smaller puppies.

Please take great care with your breedings and hopefully you will have success.

*Valerie Allenden

Introduction

We have put this booklet together in the hope that all Bull Terrier (Miniature) breeders can benefit. How often do you hear the statement ' I don't know what dog to use over my bitch !' and 'What dogs are available ?'

It is hoped that this publication will make the task a little easier by having a listing to refer to (which should assist breeders in their choosing the most suitable mate for their bitch).

Not all the dogs listed are in show homes, some are in pet homes and these are the ones often forgotten and overlooked.

This is the most comprehensive reference we have been able to compile to date (invitations were sent to all known Bull Terrier (Miniature) breeders throughout Australia to participate in this project). If any dog owners would like to have their dogs included in the next printing (we hope to update the reference on a regular basis) please send in the details to PO Box 59 Dora Creek NSW 2264.

We have felt for some time that a reference tool such as this is long overdue.

We would like to thank all those who have contributed to this project and a special thank you to our sponsor - TUCKER TIME.

Acknowledgment

We wish to thank our sponsor - TUCKER TIME for their support and faith in us and as well, the Australian National Kennel Council for their permission to reprint the Bull Terrier Standard.

The Australian National Kennel Council's Breed Standard

- BULL TERRIER -

(Kennel Club, London)

GENERAL APPEARANCE - Strongly built, muscular, well balanced and active with a keen, determined and intelligent expression.

CHARACTERISTICS - The Bull Terrier is the gladiator of the canine race, full of fire and courageous. A unique feature is a downfaced, eggshaped head. Irrespective of size dogs should look masculine and bitches feminine.

TEMPERAMENT - Of even temperament and amenable to discipline. Although obstinate is particularly good with people.

HEAD AND SKULL - Head long, strong and deep right to end of muzzle, but not coarse. Viewed from front eggshaped and completely filled, its surface free from hollows or indentations. Top of skull almost flat from ear to ear. Profile curves gently downwards from top of skull to tip of nose which should be black and bent downwards at tip. Nostrils well developed and underjaw deep and strong.

MOUTH - Teeth sound, clean, strong, of good size, regular with a perfect regular and complete scissor bite, i.e. upper teeth closely overlapping lower teeth and set square to the jaws. Lips clean and tight.

EYES - Appearing narrow, obliquely placed and triangular, well sunken, black or as dark brown as possible so as to appear almost black, and with a piercing glint. Distance from tip of nose to eyes perceptibly greater than that from eyes to top of skull. Blue or partly blue undesirable.

EARS - Small, thin and placed close together. Dog should be able to hold them stiffly erect, when they point straight upwards.

NECK - Very muscular, long, arched, tapering from shoulders to head and free from loose skin.

FOREQUARTERS - Shoulders strong and muscular without loading. Shoulder blades wide, flat and held closely to chest wall and have a very pronounced backward slope of front edge from bottom to top, forming almost a right angle with upper arm. Elbows held straight and strong, pasterns upright. Forelegs have strongest type of round, quality bone, dog should stand solidly upon them and they should be perfectly parallel. In mature dogs length of foreleg should be approximately equal to depth of chest.

BODY - Body well rounded with marked spring of rib and great depth from withers to brisket, so that latter nearer ground than belly. Back short, strong with backline behind withers level, arching or roaching slightly over broad, well muscled loins. Underline from brisket to belly forms a graceful upward curve. Chest broad when viewed from front.

HINDQUARTERS - Hindlegs in parallel when viewed from behind. Thighs muscular and second thighs well developed. Stifle joint well bent and hock well angulated with bone to foot short and strong.

FEET - Round and compact with well arched toes.

TAIL - Short, set on low and carried horizontally. Thick at root, it tapers to a fine point.

GAIT/MOVEMENT - When moving appears well knit, smoothly covering ground with free, easy strides and with a typical jaunty air. When trotting, movement parallel, front and back, only converging towards centre line at faster speeds, forelegs reaching out well and hindlegs moving smoothly at hip, flexing well at stifle and hock, with great thrust.

COAT - Short, flat, even and harsh to touch with a fine gloss. Skin fitting dog tightly. A soft textured undercoat may be present in winter.

COLOUR - For White, pure white coat. Skin pigmentation and markings on head not be penalised. For Coloured, colour predominates; all other things being equal, brindle preferred. Black brindle, red, fawn and tri-colour acceptable. Tick markings in white coat undesirable. Blue and liver highly undesirable.

SIZE - There are neither weight nor height limits, but there should be the impression of maximum substance for size of dog consistent with quality and sex.

FAULTS - Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree.

NOTE - Male animals should have two apparently normal testicles fully descended into the scrotum.

Bull Terrier (Miniature)

(Kennel Club, London)

The Standard of the Bull Terrier (Miniature) is the same as that of the Bull Terrier with the exception of the following:

SIZE - Height: should not exceed 35.5 cms (14 ins.) There should be an impression of substance to size of dog. There is no weight limit. Dog should at all times be balanced

Reprinted with the kind permission of the Australian National Kennel Council.
